

# MATIAS FENOGLIO

## Full-Stack Developer

### ABOUT ME

I am a very curious and **self-taught** person, I like to travel and learn about new cultures and places, I was lucky enough to live in the **United States** and **Denmark** for a while which helped me to improve my **English** and to be able to interact with people from different parts of the world!.

I am currently looking for my first job as a **Full Stack Developer**, I love being able to work in something that I am passionate about as the **IT world**.

Portfolio

### LANGUAGES

English - Advanced  
Spanish - Native

### PROJECTS

#### Backend Developer - COCO mall

- **Marketplace** in which each user can search, filter and order different stores or products at convenience, as well as a user has the possibility to create one or more stores with their respective products. We also offer you the possibility to have an automated stock control, as well as to modify or delete a product from your store and customize the sub categories within the different types of products you sell.
- The App was developed as a group using the Scrum methodology and manipulating the versions of the APP through Git. The front-end was developed using React and Redux, and styled with Tailwind. The back-end we used Node.js, Express, Sequelize and a relational database with PostgreSQL. In addition, different APIs (Firebase, Cloudinary, MercadoLibre) were used.

#### Full Stak Developer - MatchDog

- Individually developed application in which you can search, filter and sort different breeds of dogs, as well as register a new one.
- The App uses data from an external API through a Back End developed in Node JS using Express and Sequelize.

#### Front End Developer - WeatherApp

- App to know the weather anywhere in the world in real time
- App developed individually in which we use an external Api to obtain the information. The front-end was developed using React tools and sass
